Project on Bio circularity - a - Wakeup from Dreams

The development that meets today's needs without destroying the possibilities for future generations to have their needs met

We Make it - When - Other say Can

Never ever any Progress - Without - Changes in common Practices

*Major- developments - Discovered
by
Mistakes and Accidents*

	 <p>Guiding rules are the Viking Laws</p> <table border="1"> <tr> <td> 1: Be Brave and Aggressive <i>Be direct Grab all opportunities Use varying methods of attack Be versatile and agile Attack one target at a time Don't plan everything in detail Use top quality weapons</i> </td> <td> 3: Be a good merchant <i>Find out what the market needs Don't promise what you can't keep Don't promise overpayment Arrange things so that you can return</i> </td> </tr> <tr> <td> 2: Be Prepared <i>Keep weapons in good conditions Keep in shape Find good battle comrades Agree on important points Choose one chief</i> </td> <td> 4: Keep the camp in order <i>Keep things tidy and organised Arrange enjoyable activities which strengthen the group Make sure everybody does useful work Consult all members of the group for advice</i> </td> </tr> </table>	1: Be Brave and Aggressive <i>Be direct Grab all opportunities Use varying methods of attack Be versatile and agile Attack one target at a time Don't plan everything in detail Use top quality weapons</i>	3: Be a good merchant <i>Find out what the market needs Don't promise what you can't keep Don't promise overpayment Arrange things so that you can return</i>	2: Be Prepared <i>Keep weapons in good conditions Keep in shape Find good battle comrades Agree on important points Choose one chief</i>	4: Keep the camp in order <i>Keep things tidy and organised Arrange enjoyable activities which strengthen the group Make sure everybody does useful work Consult all members of the group for advice</i>

Greetings & Feelings > Coming from the President

Cmcp Project on Bio circularity

- The path of zero > A world without any Exclusion, Carbon and Poverty

Rice - production, consumption and recycling

- Realities of Sustainability brought by the Agriculture
- It's the most important basic circularity
 - Foods feeding the people, that create
 - Hydro- and Bio-energy and Construction Material

Our contribution is a project that

- contributes to sustainability without revolutionary innovation
- contributes to real circular processes using renewable and sustainable biological raw material
- contributes to optimization of existing processes within agriculture
- contributes to strengthen the relationship between agriculture, energy, and construction

In short, the project line is the following

Project Goals & Objectives

Assess the utility of RHA as supplementary cementing material (SCM) in design of cement/concrete mixtures

Project Benefits

5 kg. RHA = 30-40 kg. conventional cement

- ▶ Less packaging cost
- ▶ Less warehouse cost
- ▶ Less transport cost

Project facts

This in line with the President of Philippine current thrust:

- **Agriculture, Energy and Construction**

UN defines poverty a lack of food, education and energy:

- **Carbon emissions rise 2-3 times by mid-century.**

It is great to declare "**Green climate solutions**", being **Norwegian**, in origin and by experience

- started in the early 70's, guided by the world famous "Gro" Harlem Brundtland, the Mother of Sustainable Development - in the UN
